[Max. Marks : 35

PART - I

Choose the correct answer.

10X1=10

1. Which of the following function is with a return value and without any argument?
a) `x = display (int, int)` b) `display (char)` c) `y = display (float)` d) `x = display()`
2. Which of the following is the scope operator?
a) `>` b) `::` c) `%` d) `&`
3. The function `pow (2,3)` will return
a) 8 b) 16 c) 24 d) 6
4. `int age [ ] = {6,90,20,18,2};`
The element stored in `age [2]` is
a) 6 b) 90 c) 2 d) 20
5. By default, a string ends with which character?
a) `\0` b) `\t` c) `\n` d) `\b`
6. The mechanism by which the data and functions are bound together into a single unit is known as _____
a) Inheritance b) Encapsulation c) Polymorphism d) Abstraction
7. Which of the following supports the transitive nature of data?
a) Inheritance b) Encapsulation c) Polymorphism d) Abstraction
8. Which function is used to check whether a character is alphanumeric or not.
a) `isalpha()` b) `isdigit()` c) `isalnum()` d) `islower()`
9. Which of the following is the collection of variables of the same type that can be referenced by a common name?
a) `int` b) `float` c) `Array` d) `class`
10. "Write once and use it multiple time" can be achieved by
a) Redundancy b) Reusability c) Modification d) Composition

PART - II

Answer any THREE of the following:

3x2= 6

11. What is the importance of void data type.
12. What are Strings in C++?

CH / II / C.S / I

13. What is polymorphism?

14. What is the syntax to declare two – dimensional array.

PART - III

Answer any THREE of the following:

3x3= 9

15. What is the difference between isupper() and toupper() functions?

16. Define an Array? What are the types?

17. List some of the features of modular programming.

18. What are default arguments? Give example.

PART - IV

Answer all questions:

2x5=10

19. (a) Explain scope of variable with example.

(OR)

(b) Explain Call by value method with suitable example.

20. (a) Write a note on the basic concepts that support OOPs?

(OR)

(b) Debug the following C++ program to get the given output:

Output :

Blue

Red

Orange

Yellow

Program :

```
&include<Iostream>
```

```
using std namespace;
```

```
int MAIN( )
```

```
{
```

```
char colour (4)(10)= [ "Blue", "Red", "Orange", "yellow" ]
```

```
for (x=0; x < 2; x++)
```

```
cout >> colour [x] >> '\n';
```
