COMPUTER SCIENCE

Time Allowed : 1.30 Hours

[Max. Marks : 35]

Choose the correct answer:

10x1=10

- The values which are passed to a function definition are called
(a) Arguments (b) Subroutines (c) Function (d) Definition
- is a set of action that an object can do
(a) Operating System (b) Compiler (c) Interface (d) Interpreter
- The data type whose representation is unknown are called
(a) Built in datatype (b) Derived datatype (c) Concrete datatype (d) Abstract datatype
- A sequence of immutable objects is called
(a) Built in (b) List (c) Tuple (d) Derived data
- The process of binding a variable name with an object is called
(a) Scope (b) Mapping (c) Late binding (d) Early binding
- Which of the following members of a class can be handled only from within the class?
(a) Public members (b) Protected members
(c) Secured members (d) Private members
- A way of designing algorithm is called
(a) Algorithmic strategy (b) Memorization
(c) Storing value property (d) Mapping
- In dynamic programming, the technique of storing the previously calculated values is called?
(a) Saving value property (b) Storing value property
(c) Memoization (d) Mapping
- Which operator is also called as Conditional operator?
(a) Ternary (b) Relational (c) Logical (d) Assignment
- String data can be enclosed in
(a) Single quotes (b) Double quotes (c) Triple quotes (d) All of these

PART - II

Answer any THREE of the following:

3×2=6

11. Differentiate interface and implementation.
12. What is Mapping?
13. What is searching? Write its types.
14. Write the output for the following python code.

```
>>> x="10"
```

```
>>> y="20"
```

```
>>> z=x+y
```

```
>>> print(z)
```

PART - III

Answer any THREE of the following:

3×3=9

15. Why strlen is called pure function?
16. What are the different ways to access elements of a list? Give example.
17. Define Global Scope with an example.
18. List the characteristics of an algorithm.

PART - IV

Answer all questions:

2×5=10

19. (a) What are called parameters and write note on

(a) Parameter without type

(b) Parameter with type

(OR)

(b) Explain the type of scopes for variable with example?

20. (a) Explain the Bubble sort algorithm with example.

(OR)

(b) Explain input and print function with examples.
