FIRST REVISION EXAMINATION - JANUARY - 2025

Time Allowed : 3.00 Hours

BIOLOGY

Part - I (Bio-Botany) (Marks : 35)

[Max. Marks : 70]

Section - I

Note. (i) Answer All the questions. akwaacademy.blogspot.com

8×1=8

(ii) Choose the most appropriate answer from the given four alternatives and write the option code and corresponding answer.

1. Crossing over takes place in the stage of meiosis I Prophase
a) Zygotene b) Pachytene c) Diplotene d) Diakinesis
2. In cell A the solute potential is -5, pressure potential 2
In cell B the solute potential is -10, pressure potential 8.
In cell C the solute potential is -6, pressure potential 5 find the path of water across the root cell
a) A - C - B b) A - B - C c) B - C - A d) C - B - A
3. Assertion : Cellulose is an monosaccharides.
Reason : cellulose is not built from repeated units of glucose monomer.
a) Both Assertion and reason are correct b) Assertion is incorrect reason is correct
c) Assertion is correct reason is incorrect d) Both assertion and reason are incorrect
4. The haploid number of chromosome for an angiosperm is 28, the number of chromosome in its endosperm would be...
a) 84 b) 56 c) 28 d) 14
5. Select the incorrectly matched pair:
i. Thyrus - Ocimum
ii. Umbel - Allium cepa
iii. Spikelet - Paddy
iv. Polychasial cyme - Daucus carota
The two sub units of ribosomes remain United at critical ion level of..
a) Magnesium b) sodium c) ferrous d) Mn
7. Which are considered as "Biological puzzle"....
a) Fungi b) virus c) algae d) bacteria
8. Which one of the following hormone involved in ripening of fruits.
a) Ethylene b) auxin c) cytokinin d) ABA

SECTION - II

II. Answer any four of the following.

4×2=8

9. Define Bolting.
10. What is meant by Respiratory Quotient?
11. Name the types of chromosomes based on the position of centromere.
12. Mention the different types of plasmolysis seen in plant cells.
13. What is virion?
14. What is meant by Binomial nomenclature? Give example.

SECTION - II

III. Answer any three questions. Question number 19 is compulsory.

15. Name any two Agar yielding plant.
16. Explain partial parasite with example.
17. Differentiate cyclic photophosphorylation from non cyclic photophosphorylation.
18. Compare Gymnosperm with Angiosperm.
19. Write the Steps involved in Gram Staining.

2×5=10

SECTION - IV

IV. Answer all the questions.

20. (a) Write the physiological effects of cytokinins. (OR)
(b) Explain the different types of fleshy fruits.
21. (a) Differentiate between Dicot stem & monocot stem. (OR)
(b) Write the schematic representation of kreb's cycle.

PART - II (BIO-ZOOLOGY) (Max. Marks: 35)

SECTION - I

akwaacademy.blogspot.com

8x1=8

- I. Choose the correct answer.
- Which one of the following is not a character of chordate?
 - They are bilaterally symmetrical, triploblastic & Coelomate animals.
 - In higher chordates notochord is replaced by vertebral column.
 - In terrestrial chordates functional gill clefts are present.
 - Heart is ventrally placed
 - Buccopharyngeal respiration in frog
 - is increased when nostrils are closed
 - is increased when it is catching fly
 - Stops when there is pulmonary respiration
 - Stops when mouth is open
 - Assertion (A): Large intestine is also having villi like small intestine.
Reason (R) : Absorption of water takes place in large intestine.
 - Both (A) & (R) are true & (R) explains (A)
 - Both (A) & (R) are true & (R) does not explain (A)
 - Both (A) & (R) are false
 - (A) is false but (R) is true
 - Column I represents diseases & column II represents their symptoms. Choose the correctly paired option.

Column I	Column II
P) Asthma	(i) Recurring of bronchitis
Q) Emphysema	(ii) Accumulation of WBC in alveolus
R) Pneumonia	(iii) Allergy

 - P - (iii), Q - (ii), R - (i)
 - P - (iii), Q - (i), R - (ii)
 - P - (ii), Q - (iii), R - (i)
 - P - (ii), Q - (i), R - (iii)
 - Which is not correct for sponges?
 - Internal fertilization
 - Gemmule formation
 - Hermaphrodites
 - External fertilization
 - If Henle's loop were absent from mammalian nephron, which one of the following is to be expected?
 - There will be no urine formation
 - There will be hardly any changes in the quality & quantity of urine formed.
 - The urine will be more concentrated
 - The urine will be more diluted
 - The abundant intracellular cation is
 - H⁺
 - K⁺
 - Na⁺
 - Ca⁺⁺
 - Silk is obtained from
 - Laccifer lacca
 - Nosema bombycis
 - attacus ricni
 - Attacus mylitta

SECTION - II

II. Answer any Four questions:

4x2=8

- Compare Schizocoelom with enterocoelom.
- What are the components of blood of frog?
- Write the peculiar characters of Duck.
- What is the role of Charles Darwin in relation to concept of species?
- List out the different types of WBC.
- Comment on Homeostasis.

SECTION - III

3x3=9

- III. Answer any three of the following questions. Question Number 19 is compulsory.
- Differentiate white adipose tissue from brown adipose tissue.
 - Write a note on nitrogen narcosis.
 - Draw the structure of a nerve cell and label the parts.
 - Write the nutritive value of fish.
 - Name the layers of adrenal cortex & mention their secretion.

SECTION - IV

IV. Answer the Questions .

2x5=10

- Write the characteristic features of Arthropoda. (OR)
 - Describe the structure of the human heart with the help of a diagram.
- Draw the diagram of L.S. of the eye and label the parts. (OR)
 - Explain the life cycle of Bombyx mori.
